Abstracts

The Asia Pacific Teleradiology Market would witness market growth of 18.63% CAGR during the forecast period (2019-2025).

An increase in the numbers of imaging procedures, introducing the Picture Archiving and Communication System (PACS) and growing eHealth R&D activities are the other key factors that would fuel demand for teleradiology services over the forecast period. However, ongoing global efforts to improve knowledge of diagnosis and management of disease through educational programs raise awareness among individuals. These programs help to identify untapped market opportunities for cost-effective treatment of disease.

The Asia Pacific has been estimated to witness the highest market growth during the forecast period. The growth can be attributed to the extensive demand for advanced and innovative clinical solutions combined with the region's rapidly expanding healthcare infrastructure. It is also anticipated that supporting government initiatives, major firms' global expansion strategies, and the region's rapid increase in the target population would fuel growth.
