Abstracts

The Asia Pacific Tumor Ablation Market would witness market growth of 13.1% CAGR during the forecast period (2019-2025).

Technological innovations to enhance accuracy, portability, and cost-effectiveness are factors that enable market players to continuously improve and launch advanced products. Image-guided equipment and cryoablation are notable examples of these new technologies. The use of cooled radiofrequency denervation technology with internally cooled radiofrequency probes to increase the size of the lesion is one of the new technologies that is expected to play an important role in the expansion of the sector. This procedure allows complete denervation of the sacroiliac joint, which assists in the treatment of pain.

The microwave ablation technology is expected to experience an exponential market growth during the forecast period. Unlike electrical current in a radiofrequency ablation device, the energy of the microwave (MW) ablation device propagates electromagnetic effect. This improves the use of microwave ablation technology in fabrics with low

electrical conductivity such as bones and lungs.

The major benefits of this technology are the increased volume of tumor ablation, high-temperature stability, low ablation discomfort, and optimal cystic mass heating. Such advantages are expected to support the growth of this segment. In addition, the minimum duration of the procedure (5-10 minutes), improved efficacy with minimal complications and minimized hospital stay are projected to drive segment development.

Based on Treatment, the market is segmented into Surgical Ablation, Laparoscopic Ablation and Percutaneous Ablation. Based on Technology, the market is segmented into Radiofrequency Ablation, Microwave Ablation, Cryoablation, Irreversible Electroporation and Other Technology. Based on Application, the market is segmented into Liver Cancer, Breast Cancer, Lung Cancer, Kidney Cancer, Prostate Cancer and Other Cancer. Based on countries, the market is segmented into China, Japan, India, South Korea, Singapore, Australia, and Rest of Asia Pacific.
