## Abstracts

Virtual training is a simulated virtual environment which is created to assess the capabilities of trainees to select the right resource. The virtual training simulation is of two kinds, namely instructor-led training and non-instructor-supported training. Simulation, by definition is a process of imitation of an operation of a real world system or a process.

Higher defense, education & healthcare expenditures, rising awareness about the virtual training technology, and cost-effectiveness for various industries are the major factors driving the market growth. Major market leaders are working on developing novel solutions by heavily investing on R&D. New market opportunities are explored by expanding the market presence with strategies such as partnerships, collaborations, and other strategic alliances. More compact and cost-effective simulators are developed by leading market players that can elevate the quality of virtual environment much like the real world situation.

The Asia-Pacific virtual training and simulation market is segmented based on components, end user, and country. The components segment is further sub-segmented into hardware and software. Based on end users, the market is segmented into defense & security, civil aviation, education, entertainment, and others. The education segment is further bifurcated into e-learning and game-based learning.

Based on Country, Asia-Pacific Virtual Training and Simulation market is segmented into China, Japan, India, South Korea, Singapore, Malaysia and Rest of Asia-Pacific. China remained the dominant Country in the Asia-Pacific Virtual Training and Simulation market in 2015. Japan and India would witness high growth during the forecast period (2016-2022).
