Abstracts

The Asia Pacific Visual Analytics Market would witness market growth of 24.2% CAGR during the forecast period (2017 – 2023). Visual analytics is a process of understanding data in an interactive, graphical manner to single out insights for solving a problem. The technology is used by data scientists and other professionals to pick trends, patterns and relationships in the data that is being worked on. Packaged visual analytics software tools are used by non-technical users. The packaged tools are simple to use and include drag-and-drop options for setting and modifying analytical parameters. The APAC region would be the fastest-growing region as there is an increasing adoption of Internet of Things (IoT) and smart technologies, and government initiatives such as smart cities across the APAC countries, including China and India.
