## Abstracts

The Asia Pacific Water soluble polymer Market would witness market growth of 7.4% CAGR during the forecast period (2019-2025).

Water soluble polymers include a broad range of mineral polymers of either natural or synthetic origin and are primarily used to facilitate the process of separating materials in suspension in an aqueous environment. In chemical procedures like thickening, dispersion, flocculation, gelling, coagulation, and modification of rheology, they have widespread apps. Synthetic Water-Soluble Polymers are organic materials that dissolve, spread, or swell in water and thus influence the physical attributes of gelation, thickening, or emulsification/stabilization of aqueous systems.

Manufacturing industries are moving from the U.S., Western Europe, and Japan to other areas such as Southeast Asia and China, driving the region's water-soluble polymer industry. Increasing per capita usage in rapidly-growing GDP economies like China and Southeast Asia drives demand for water-soluble polymers in segments like food, personal care products, and pharmaceuticals. China, Japan, and India are the region's biggest markets. In terms of consumption and value, China is the major economy and the fastest growing market in the region and around the globe.

Based on Type, the market is segmented into Polyacrylamide & Copolymers, Guar Gum & Derivatives, Polyvinyl Alcohol, Casein, Gelatin, Polyacrylic Acid & Copolymers and Other Types.
