The Europe Air Humidifier Market would witness market growth of 4.05% CAGR during the forecast period (2019–2025).

Increase in health awareness is the key driver for the air humidifier market growth. Moreover, change in lifestyle, and rapid growth in the commercial and residential construction sector, and government standards and regulations to maintain humidity are the other factors supplementing the growth of the global air humidifier market. In addition, the adoption of new technology by the consumers and awareness of static electricity issue among all the industries are expected to open new avenues for the air humidifier market players in the future. However, regular maintenance of internal parts of the air humidifier and awareness about the side effects of white dust that is produced after the evaporation of minerals present in water are expected to hamper the growth of the air humidifier market.
