Abstracts

The Europe Airless Packaging Market would witness market growth of 5.7% CAGR during the forecast period (2017 – 2023). An airless packaging system is a non-pressurized device used in dispensing pump, and also provides high restitution rate & low wastage, avoiding backflow of air in the system. The growth in these regions is due to technological advancements, and growing demand for recyclable & high-end products. Consumers in the European region are highly inclined towards green products, over recyclable products. Additionally, government regulations and legislations pertaining to reducing pollutants and growing awareness about eco-friendly products would contribute to the market growth. However, high production cost associated with the airless packaging products would be a threat to the market growth.

Based on Packaging Type, the Airless Packaging market segments the market into Bottles & Jars, Bags & Pouches, Tubes, and Others. Based on Material Type, the market report segments the market into Plastics, Glass, and Others. Based on End User, the Airless Packaging market segments the market into Personal Care, Healthcare, Home Care, and Others. Based on Countries, the Airless Packaging market segments the market into Germany, UK, France, Russia, Spain, Italy, and Rest of Europe.
