The Europe Antimicrobial Coatings Market size is expected to grow at a CAGR of 13.9% during the forecast period. Antimicrobial coatings are employed to prevent the growth of bacteria and other organisms on several surfaces. These are an ultimate overlay material used to destroy the growth of microorganism. The adoption of antimicrobial coatings would grow in various applications such as orthopedic implants, cardiac implants, dentistry, and others. These coatings are used to completely cover the implant's surface, and as a result, limiting the impact of bacterial adhesion and biofilm formation. Additionally, the coatings impede the growth of different microbes on the surface and nearby tissues, and as a result, prevent the possibility of bacterial infections.

The growing concern of bacterial infection associated with the medical devices that are implanted in patient's body, rising chronic diseases and rapid rise in geriatric population is driving the market growth. The antimicrobial coatings are nontoxic, bio compatible and bio stable for a wide range of medical devices, thereby adding boost the market growth.

The Europe antimicrobial coatings market is segmented into material, type and country. On the basis of material, the market is segmented into metallic coatings & non-metallic coatings.
