The Europe Application Transformation Market would witness market growth of 11.4% CAGR during the forecast period (2019–2025).

Europe is one of the leading regional markets and is likely to experience remarkable growth over the coming years. The market growth is mainly due to the rising demand for retail application sectors. Emerging technologies coupled with significant cost reductions in cloud deployment models are some of the major contributing factors to the growth of application transformation market in Europe. Further, strong technical expertise and a bigger IT budget are driving the market in Europe.
