Airports today have increasingly complex operations. Therefore airports need excellence across verticals, with diverse set of capabilities and the management of many different stakeholders. Airports have distinctive roles to fulfil with challenges to drive efficiency, service quality, and ultimately passenger growth. There are increasing service expectations from both passengers and airlines; regulator-imposed challenges on aeronautical charges; and the need to fulfil a national, regional, or municipal development role.

Managing investment and choosing right avenues to invest will be critical to meet the challenges prevailing. Airports have differentiated capabilities, giving it a unique and sustainable edge over other markets and therefore, requiring substantial investment. Differentiating vital elements that make a difference to airlines and passengers from that of that does not make an impact is vital for the success of the airport.
