## **Abstracts**

The Europe Dashboard Camera Market would witness market growth of 14.2% CAGR during the forecast period (2020-2026).

The advantages of dashboard cameras among drivers around the world have been increased because of frequent news of videotapes of road accidents and dashboard accidents. In addition, governments in a number of European states including the United Kingdom, France and Italy are encouraged to use dashcams to document footages for monitoring purposes which can later be used as evidence in the proceedings.

In the trucking industry, the use of Dashcams grows; as more and more drivers and fleet owners install Dashcams, they reap the several advantages that they offer. The cameras from dashboards have now allowed business fleet companies to protect their vehicles by easy installation and enhanced technology. Improve driver coaching programs, the ability to see what happens in a crucial incident and overall fleet safety improvements are some of the main motivators for increasing dashboard installation.

In order to encourage their acceptance among the individual drivers as well as among commercial vehicles drivers and owners, prominent industry participants have begun

developing innovative DVRs with advanced safety features, like blind spot detection, collision prevention systems, voice reminders and lane start warning systems. Some manufacturers are also starting to offer Wi-Fi accessible dashboard cameras, where users can use mobile applications to transfer footage to their smartphone.
