Abstracts

The Europe Food Processing Seals Market would witness market growth of 5.2% CAGR during the forecast period (2020-2026).

At present, busy lifestyles and time restraints have increased consumer dependence on processed food. In most countries, the intake of highly processed food has risen dramatically. Specifically, middle-income countries have experienced the largest shift in dietary patterns, including the consumption of highly processed food. For example, the consumption of sugar-sweetened drinks has risen globally in major regions. Moreover, the growth in the metropolitan population continues to raise the market for processed food. As a consequence, growth in the processed food industry significantly raises the need for seals, as seals help to preserve food safety and avoid contamination and leakage.

Food processing seals are seals used in the food manufacturing industry to prevent leakage. Furthermore, seals used in food processing avoid contamination of food by stopping microbial growth. Sealing materials used in the food processing sector have to be corrosive-resistant and must, therefore, conform with an increasing number of regulations, such as FDA, 3-A, and NSF guidelines.

The rapid growth of processed and packaged food in countries such as Germany, the United Kingdom, France, and Russia is pushing demand for food processing seals. Moreover, the existence of tight restrictions on the usage of food-grade seals and seal

content is anticipated to fuel demand for food processing seals.

Based on Material, the market is segmented into Elastomers, Face Materials and Metal. Based on Application, the market is segmented into Bakery & Confectionery, Beverages; Meat, Poultry & Seafood; Dairy Products, and other Applications. Based on countries, the market is segmented into Germany, UK, France, Russia, Spain, Italy, and Rest of Europe.
