Abstracts

The Europe Frozen Fruits Market would witness market growth of 8.2% CAGR during the forecast period (2020-2026).

Growth in the frozen fruit market is driven by innovation in packaging, an increase in disposable income, and a boom in both online and retail spaces. In the long term, the European market for frozen berries is expected to have stable growth per year.

This rise is likely to be influenced by changes in European consumers' habits of eating, especially the popularity of smoothies as a convenient and healthier breakfast alternative. In addition, industrial consumers (primarily in dairy, bakery/pastry, and beverage) are inventing fresh, creative, and healthy alternatives with frozen berries as the key ingredient. Germany, France, the United Kingdom, Belgium, the Netherlands and Italy offer opportunities to suppliers in developing countries.
