The Europe Industrial Control Systems Security Market would grow at a CAGR of 5.3% during 2017 -2023. ICS are more often used in to support critical infrastructure activities, security updates largely go missing; therefore, these platforms remain unpatched and vulnerable to external and internal threats. Additionally, as the systems come with limited computing resources, running antimalware software is also a challenge. The industrial control systems are majorly used in power generation, transmission, and distribution sectors. These systems are used in collecting, storing, and analyzing data from various data points from national or regional networks. The rapid growth in the incidences of cyber-attacks and network security threats, significant growth in the investments related to smart technologies, and governmental support for Industrial Control Systems Security (ICS security) have driven the demand for ICS security solutions. The use of Industrial Control Systems (ICS) helps in monitoring industrial processes such as those in oil and gas, nuclear, power transmission and distribution, manufacturing, chemical, and other industries.
