## **Abstracts**

The Europe Interactive Tables Market would witness market growth of 11.2% CAGR during the forecast period (2020-2026).

Interactive tables allow for graphic designs with paintable sensors, and any hard surface can be rendered interactive by using interactive touch screen technologies. Interactive Tables based on Universal Serial Bus (USB) ensure a flexible MIDI controller that can turn any space or surface into an interactive touch-board. MP3 players are usually built into Interactive Tables. These built-in MP3 players can transform touch into sound, and a specific tone can be used to confirm various types of commands provided to the Interactive Tables.

The role of interactive tables in providing integrated learning in the education field is gaining traction. Multi-touch tables are now commonly regarded as interactive tables. Since the emergence of bring your own device (BOYD) policies and the inclusion of touch screen gadgets in the education sector, direct group interaction with a given subject has become increasingly popular using the touch of a finger. The younger generation in particular has become more accustomed to such use of technology in their daily lives. Interactive tables encourage individual activity while allowing for the exchange of resources among all participants.

Based on Screen Size, the market is segmented into 32-65 inch and 65 inch & above. Based on Technology, the market is segmented into Capacitive, LCD, LED and Others. Based on Application, the market is segmented into Education, Exhibition & Trade
