Abstracts

The Europe Low-Code Development Platform Market would witness market growth of 24% CAGR during the forecast period (2020-2026).

Low code development tools have many benefits and more people can contribute to the application development process. These tools also help companies boost their agility. It reduces the complexity of the application process. Low code platforms have two other important benefits, i.e. high productivity and lower costs, as they develop more applications in less time.

Whether its business customers designing an app themselves or simplifying the production process for coders by automating manual procedures, low-code technology makes it simpler than ever to create versatile applications to achieve different tasks. In the long run, low-code platform applications help companies become more agile. Visual architecture that requires drawing instead of coding will speed the evolution of the image exponentially.

With the potential to create more applications with less time, prices are dropping. But

this isn't the only driver. Low-code development eliminates the need for additional developers and lowers recruiting costs. And the right low-code technology will make anyone in the enterprise–not only IT–more efficient. Low-code development allows more software to be developed with less time. What used to take months can be reduced to days or even minutes. With low-code growth, time is no longer an obstacle to real innovation.
