Abstracts

The Europe Medical Computer Carts Market would witness market growth of 14.3% CAGR during the forecast period (2018 – 2024).

Medical computer carts are designed to reduce the workload of healthcare professionals, which would result in better patient care. The product is used in different applications such as in medical training, charting, medical recording, the medicine dispensing, and surgeries. Various medical computer cart products with varying heights and prices are available, depending on the intended application base within a small, medium or large hospitals, clinics, or pharmacies. The growing prevalence of electronic medical records (EMR) systems and demand for mobile computer carts in critical surgical procedures are the factors that would drive the growth of medical computer carts market during the forecast period. However, the cost associated with owning the medical computer carts would limit the growth of the market.
