Abstracts

Medical imaging informatics (MII) is a subspecialty of biomedical informatics and it aims at providing accurate, useful, and efficient interpretations of complicated images by converting the images into simpler, communicable, and in a useful manner. The technology is largely used in health care IT sector, especially by radiologists. Medical imaging informatics is comprised of application, development, and assessment of information which are then used to treat patients effectively.

The growth of the medical imaging informatics market is majorly due to growing number of diagnostic imaging procedures, growing prevalence of chronic diseases, advanced applications, and availability of cost effective medical informatics data storage platforms. Nevertheless, lack of expertise in operating information technology integrated imaging modalities would significantly restrict the market growth.

The market is segmented based on Component, Deployment Types, End-user, Application and Country. Based on Component, the market is segmented into software, hardware and services. Based on Deployment Types, the market is segmented into Web based, On Premise and Cloud. Based on End-User, the market is segmented into hospitals, diagnostics centers, ambulatory healthcare settings and others. Based on Application, the market is segmented into Digital Radiography, Ultrasound, Magnetic Resonance Imaging, Computed Tomography, Nuclear Imaging and Others.

Based on country, Europe Medical Imaging Informatics market is segmented into Germany, UK, France, Russia, Spain, Italy and Rest of Europe. Germany remained the dominant region in the Europe Medical Imaging Informatics market in 2015. France and UK would witness promising CAGR during the forecast period (2016-2022).
