Abstracts

The Europe Motion Sensors Market would witness market growth of 7.5% CAGR during the forecast period (2019–2025).

The Europe motion sensor market is expected to account for the largest share of the overall motion sensor market throughout the forecast period. Europe has emerged as the manufacturing hub for applications including automotive and consumer electronics. These industries are also the significant contributors to the motion sensor market. The use of a motion sensor or motion detector in home security is essential to sense an intruder and send an alert message to control panel that in turn alerts the monitoring center. Some security systems can also be programmed to record events via a security camera when motion is detected. The most frequently used motion sensor is a passive infrared type of motion sensor. This type of motion sensor detects body heat and is most commonly used in home security systems.

The increasing demand for consumer electronics applications is driving the growth of the motion sensor market. Furthermore, the expanding use cases of consumer electronics including smartphones, navigation devices, portable computers, media players, gaming consoles, digital cameras, and e-readers, are a major driving factor for the growth of the market. The smartphone segment is expected to show tremendous growth due to their declining costs, increasing standard of living, and ubiquity of the Internet.

Base on Technology, the market is segmented into Infrared, Ultrasonic, Microwave, Dual Technology and Others. Based on End User, the market is segmented into Consumer Electronics, Aerospace & Defense, Healthcare, Automotive, Industrial and Others.
