Abstracts

Network forensics is a process of investigating and analyzing information about a network or network events. The network forensics is a specialized category within the more general field of digital forensics, and the technology is applicable in the various forms of IT data investigations. Typically, network forensics is a process of network analysis that tracks security attacks and other types of criminal activities on a network. The governments around the world have laid down stringent regulations that organizations must adhere to. The growing pressure from the government and state regulations on data privacy and compliance has made it a necessity for stringent security measures to be in place within the organizations. The need for effective data security measures is a pressing demand, forcing organizations to identify effective measures to counter cyber-attacks.

Based on the type, the Network Forensics market is segmented into Solution and Services. The Solution market is segmented into Intrusion Detection System (IDS)/Intrusion Prevention System (IPS), Security Information & Event Management, Threat Intelligence, Analytics Firewall, and Others. The Services market is further segmented into Professional and Managed Services. Based on Application Area, the market is segmented into Network Security, Application Security, Endpoint Security, Data Center Security, and Others. Based on Organization Size, the market is segmented into Small & Medium Enterprises and Large Enterprises. Based on Deployment Type, the market is segmented into Cloud and On-Premise. The verticals included in the report are BFSI, Government, Application Area, Healthcare, Manufacturing, Retail, Telecom & IT, Education, and Others.

Based on country, Network Forensics market is segmented into Germany, UK, France, Russia, Spain, Italy and Rest of Europe. Germany remained the dominant country in the Europe Network Forensics market in 2015. France and UK would witness promising CAGR during the forecast period (2016-2022).
