## Abstracts

The Europe Payment Security Market is expected to register a CAGR of 16.1% during the forecast period (2017 – 2023). Major focus is laid on Research and Development (R&D) and payment security technologies in the developed regions. Large companies with high volume of online payments are now compelled to use the payment risk management strategies to counter possible threats and after effects of cybercrimes.

It is vital to have fundamental security measures in place to run a successful online business. Website security is of paramount importance, and using SSL certificates further adds to the levels of security. Superior levels of security help in protecting credit card information of the customers and most importantly, build credibility. Payment Card Industry Data Security Standards (PCI DSS) are a set of rules used in creating a process flow for protecting sensitive data. Data encryption is vital while making payments without using real card data that's visible while processing. PCI guidelines would also include tokenization in the future version.

Based on Type, market report segments the market into Solution and Services. Solutions are further divided into Encryption, Tokenization, and Fraud Detection & Prevention. Services are further segmented into Professional and Managed Services. Based on Organization Sizes, the Europe Payment Security Market is segmented into Small & Medium Enterprises and Large Enterprises. Based on Verticals, the market report segments the market into BFSI & Retail, Travel & Hospitality, Healthcare, Media & Entertainment, Telecom & IT, Education, and Others.
