## **Abstracts**

The Europe Portable UV Sanitizing Boxes Market would witness market growth of 13.4% CAGR during the forecast period (2020-2026).

Most chemical cleaners cannot kill molds and spores, but UV light is successful in destroying them. In addition, germs and bacteria may be eliminated from the hands by regular washing and sanitizing, but bacteria from grocery stores, stairs, doorknobs, and people are transferred and deposited on the computer, keychains, and purses. As a result, proper sanitization of these items is also required, leading to the growth of the market for portable UV sanitizing boxes.

UV light has been used for sterilization and disinfection since the mid-20th century. With advances in technology, and especially in the UV bulbs themselves, its durable long lifetime (thousands of hours) and its smaller size (e.g. UV LED vs conventional UV bulbs) have broadened the field to where it can be used. It can be found to be used to disinfect: water, air, fruit, vegetables, surgical utensils, tablet computers, toys, and a number of surfaces.

Microorganisms such as bacteria, viruses, fungi, and residues on or in all kinds of materials or substances are killed or significantly reduced by UV disinfection and sterilization. Pathogenic organisms such as cholera, polio, typhoid, hepatitis, and other bacteria are also strongly inactivated. Sterilization and disinfection of air and water are primarily carried out through the use of UV light. Ultraviolet light is also combined with peroxide for organic waste and makes organic micro-pollutants harmless. It's more

about breaking down than eliminating UV light.

Based on Application, the market is segmented into Residential and Commercial. Based on Distribution Channel, the market is segmented into Online and Offline. Based on countries, the market is segmented into Germany, UK, France, Russia, Spain, Italy, and Rest of Europe.

The market research report covers the analysis of key stake holders of the market. Key companies profiled in the report include PhoneSoap LLC, Limestone Labs Limited (CleanSlate UV), HoMedics, Inc. (FKA Distributing Co., LLC), LovingCase (Nuoweir Company), Munchkin, Inc., ANPEI Smart Medical Device Technology Co., Ltd., Phone Tub Limited, Coospider UVC, Guangdong Liangyueliang Photoelectric Technology Co., Ltd., and 59S Company.
