Abstracts

The Europe Smart Bathroom Market would witness market growth of 15.3% CAGR during the forecast period (2020-2026).

Smart bathrooms utilize automated pipes and sanitary products that can be controlled through cell phones or other smart gadgets utilizing the Internet. The growing demand for maintenance of hygiene-related to the shift seen towards urbanization is probably going to help the development of the smart bathroom market throughout the forecast period. Besides, the exploding growth of the population would act as a growth impetus for the market players.

Increased penetration of smart homes across developed countries of Europe is showing higher acceptance for smart bathrooms. As per the studies, there were about 30.5 million smart homes in Europe toward the finish of 2018. The rising development of smart homes due to increasing lavish lifestyles is bringing about the installation of smart bathrooms. Customers have been demonstrating a growing tendency towards bathrooms that give a spa-like experience with built-in smart fittings, toilets, faucets, and soap dispensers that work on sensors.

Besides, fast development in the commercial area, especially the hospitality division, is driving the demand for smart washroom fittings and fixtures. As indicated by the Office of National Statistics, the hospitality business in the U.K. increased from USD 110.37 billion in 2015 to USD 125.78 billion in 2017. The hotel business shapes a significant demand contributing factor to the nation's hospitality area and overall economy, in this manner prodding the development of hotels. Likewise, as per the London Hotel Development Monitor Report 2018, the hotel business in London is anticipated to add

11,600 rooms to its hotel market before the finish of 2020. These components are probably going to optimistically affect market growth.
