Abstracts

The Europe Software Defined Perimeter Market would witness market growth of 22.9% CAGR during the forecast period (2019-2025).

The evolution of IoT and the developments in Bring Your Own Device (BYOD) are expected to boost growth. Increased adoption of cloud technology by small and medium-sized businesses is expected to fuel the overall software defined perimeter (SDP) market. Increasing exposure to cloud migration has made it challenging for companies to secure the perimeter effectively. Major market growth factors include a growing need for a policy-based security architecture to reduce network complexity and an increasing demand for cloud-based applications.

The development of new applications and innovations worldwide is driving the growth of the global market for software defined perimeter (SDP). Software-defined perimeter (SDP) is an approach-based security system that reduces network-based attacks. A complex perimeter on the network is designed to protect the data stored in cloud and other data centers. The requirement for security system, the, cloud-based services, and digitization has driven market demand for software defined perimeter (SDP). The software defined perimeter (SDP) market is anticipated to show remarkable growth during the forecast period as a consequence of the aforementioned factors.

The Software-Defined Perimeter creates one-to-one network connections dynamically between the user and the resources they access. This ensures that all endpoints attempting to access a specified infrastructure are authenticated and approved before being able to access any network resources. All unauthorized network resources shall be made unavailable. This not only extends the concept of least privilege to the network, but also limits the surface area of attack by protecting network resources from unwanted or unauthorized users.

Based on Component, the market is segmented into Solution and Services. Solution segment is further bifurcated into Access Control, Risk Analytics & Visualization, Performance Management & Reporting, Security Compliance & Policy Management and Others.
