Abstracts

The Europe Specialty Lighting Market would witness market growth of 8.1% CAGR during the forecast period (2020-2026).

In Europe, the specialty lighting industry has witnessed a rapid spread due to increased government investment in efficient lighting technologies. In addition, countries such as Russia, Germany, Denmark and the United Kingdom are focusing on the deployment of efficient lighting to improve lighting quality and reduce overall operating costs, which will further increase demand for LED lighting products and solutions.

The demand for purification is related to the use of special UV lights for the purification of water, air and surfaces. The worldwide demand for water purification has expanded due to the depletion of water supplies and the recycling of wastewater. In addition, air purification is vital in hospitals and testing laboratories to avoid foreign particles in medicines or samples. Surface purification is necessary to disinfect the surface or to avoid the formation of bacteria. UV-CLEAN, a no-touch technique with an absolutely dangerous wavelength to destroy microorganisms uses an automated disinfection system to inactivate microorganisms at the genetic level using UV-C energy. The use of UV lighting for the purification or disinfection of the site is therefore expected to contribute to the growth of the segment.

Based on Light Type, the market is segmented into LED and Others. Based on Application, the market is segmented into Entertainment, Medical, Purification and Others. Medical segment is further bifurcated into Surgical Lighting and Examination. Based on countries, the market is segmented into Germany, UK, France, Russia, Spain, Italy, and Rest of Europe.
