Abstracts

The Europe Tea Tree Oil Market would witness market growth of 5.25% CAGR during the forecast period (2019–2025).

Increase in demand for natural cosmetic products that cause lesser side-effects and other benefits, in Europe, is expecting a boost in the growth of the market in this region. Tea tree oil has been used in traditional medicine in the belief it treats acne, nail fungus, or athlete's foot, with little evidence to support these uses. Tea tree oil brings a higher rate of demand from the cosmetic industry due to its large-scale application in the production of shampoos, conditioners, skin clearing lotion, mouthwash, body lotions, shower gels, cleansing soap, deodorants, hand wash sanitizers, and face creams. The tea tree oil is expected to gain higher traction from the pharmaceutical industry due to its anti-inflammatory, antifungal, and antiviral properties. Moreover, in the recent past, there has been a rise in preference for natural products among the consumers specifically when it comes to cosmetic and skin care products.
