Abstracts

The Europe Warehouse Order Picking Market would witness market growth of 9% CAGR during the forecast period (2019-2025). The e-commerce industry's massive growth has led to an increase in the number of distribution centers. This can be related to the potential of distribution systems to process orders with less travel time and greater accuracy. As a result, e-commerce warehouse operators are working to integrate these innovations into their premises.

Contemporary technology solutions including voice-directed, Augmented Reality (AR) and pick-to-light are included in the category of 'other.' Such technologies are expected to experience substantial growth, although currently they are in their nascent stage. These systems strive to provide personnel in warehouses with navigation facilities without having to worry about data input, scanning, and notetaking. AR-based technology, for example, is a combination of voice-based and vision-based order picking technologies. The technology uses smart glasses to display virtual images and helps increase the speed and precision of operations.

Based on Solution, the market is segmented into Barcode scanning/ RFID picking, Paper-based and Others. Based on Deployment Type, the market is segmented into On-premise and Hosted. Based on Vertical, the market is segmented into Manufacturing, Retail, Transportation & Logistics, E-commerce, Healthcare, Pharma & Cosmetics, Construction and Others.
