Abstracts

The Europe Workflow Orchestration Market would witness market growth of 26% CAGR during the forecast period (2017 – 2023). Orchestration workflow is based on Business Process Definition, which defines the logical flow of activities or tasks from the Start of an event to the End of an event, to reach specific service goals. The service is either initiated by events triggered by SmartCloud Orchestrator management actions or by user actions in the SmartCloud Orchestrator user interface. The activities that fall within the scope of the services are scripts (JavaScript), Java implementations, web services or REST calls, human tasks, and others. These services can be executed in sequence or in parallel with interleaving decision points. Lack of technical workforce would be a major factor that would limit the market growth.
