Abstracts

The Global Asset Performance Management Market size is expected to reach \$23.8 billion by 2025, rising at a market growth of 9.1% CAGR during the forecast period. Asset performance management has enabled asset-intensive industries like manufacturing, mining, oil and gas, transportation, and utilities to gain a better control over the operational life of their crucial assets. The implementation of an asset performance management system and accompanying applications also help these sectors to switch from a break-fix solution to maintenance to a more progressive approach. This transition leads to lower unplanned downtime, minimal maintenance costs, and increased availability of assets.

Use of advanced technology including predictive analytics, pattern recognition, artificial intelligence and machine learning enables the asset performance management systems to analyze crucial metrics like uptime and mean time. It further helps to repair and ensure asset shelf life to assist in decision making which can improve the asset's reliability and reduce equipment downtime. Equipment failure is a significant risk for businesses as it delays a product's or service's delivery. The implementation of an asset performance management approach has been driven by the emergence of industrial internet of things, big data, and minimal-cost equipment sensors from the industrial internet that enables asset performance data to be obtained in real-time.

Based on Category, the market is segmented into Asset Reliability Management, Asset Strategy Management, Predictive Asset Management and Others. Based on Deployment Type, the market is segmented into On-premise and Hosted. Based on Vertical, the market is segmented into Energy & Utilities, Oil & Gas, Manufacturing, Mining & Metal, Government & Public Sector, Chemicals & Pharmaceutical and Others. The Government & Public Sector segment is projected to grow at the highest CAGR

between 2019 and 2025. The trend can be linked to ongoing deployment of wastewater treatment projects throughout developing countries like Malaysia, Brazil, and Mexico. During the forecast period, the manufacturing segment is expected to be a major market share holder and grow at a significant CAGR. Due to the increasing volume of manufacturing plants coming up in the region, the segment is expected to see the fastest growth in Asia Pacific.

Based on Regions, the market is segmented into North America, Europe, Asia Pacific, and Latin America, Middle East & Africa. In 2018, North America reported for more than 30 percent market share. Many key players in the industry and established companies are based in North America. Therefore, the region was always at the forefront of research and development activities in the IIoT sector and therefore has a dominant market position.

The major strategies followed by the market participants are Product launches and Partnerships & Collaborations. Based on the Analysis presented in the Cardinal matrix, General Electric (GE) Co., Siemens AG, SAP SE, and IBM Corporation are some of the forerunners in the Asset Performance Management Market.
