Abstracts

Emotion Detection & Recognition (EDR) Market is being largely used to track consumers' emotional connect to a particular brand; however, it is now growing far beyond mere tracking to making effective brand presentation. Initially, the EDR systems were employed by law enforcement and surveillance departments to detect lie and polygraph tests. Nevertheless, the applications of ERD is growing deep into several verticals such as research and gaming. Therefore, the need for sophisticated and advanced technologies to standardize emotion detection has propelled the market growth globally.

The emotion detection and recognition (EDR) market, globally, is forecast to grow at a CAGR of 27.4% and is anticipated to reach USD 29,179.8 million by 2022. EDR software is used in tracking the emotions of a user at any given point in time, using webcams or other specialized equipment and then accordingly analyze link to the behavioural patterns and emotional changes.
