## Abstracts

Incident response is a systematic process of addressing and managing the security breach or attack. The primary goal of the process is to control the situation and limit the potential damage caused and also take steps to minimize recovery time and cost involved. An incident response plan is a policy that clearly chalks down in specific terms, what an incident constitutes and also accordingly provides a step-by-step process to be followed in case of an incident. Rise in enterprise level security breaches, highly sophisticated nature of attacks, and improved return-on-investments are some the major factors that would contribute to the market growth.
