Industrial Protective Footwear (also known as safety boot or shoe) is protective equipment that helps to protect foot from falling objects, direct compression threats. Heavy building materials and construction equipment could pose serious injury to the body, including feet. That is why it is mainly preferred by different construction industries. The factors leading the growth of the market are rapid industrial development and increase in the number of workers accidents. According to National Safety Council, thousands of workers reports disabling toe and foot injuries annually. Additionally, Government regulations and rules regarding workers safety, and introduction of innovative products are also driving the growth of industrial protective footwear market. However, factors such as lack of awareness among workers in small and mid-sized industries in developing countries and rising presence of cheap quality safety shoes would be restraining the growth of industrial protective footwear market.
