Abstracts

The Global Organic Liquid Soaps Market size is expected to reach \$111.7 Million by 2026, rising at a market growth of 12% CAGR during the forecast period. Organic liquid soap is a type of cleansing agent made up of organic ingredients. It is manufactured through organic methods and mostly they are free from artificial chemicals according to the regulation set by the organic certification bodies. Organic soaps are specialized by numerous certification bodies all across the globe like the EU Organic Certification, Australian Certified Organic, United States Department of Agriculture (USDA), and Nature's International Certification Services (NICS).

Organic liquid soaps are considered as chemical-free products that are processed from organic oil and natural raw ingredients. Increase in preference for better quality products, rise in awareness about organic soaps, and an increase in incidences of skin allergies and diseases worldwide are likely to fuel the sales of Organic liquid soaps in the next few years. In addition to all it, products with the advanced formulation and improved with unique ingredients are likely to remain an attraction among end-users. This is expected to drive the demand for organic soaps in the coming years.

Some of the key driving factors of the global organic liquid soap market include a rise in awareness about the harmful effects of conventional products, growth in consumer base who are preferring organic products, a surge in start-ups involved in the manufacturing of the organic product, increase in disposable income of people, celebrities are more indulged in endorsing organic liquid soaps compared to conventional soaps and

increase in the penetration of products in major specialty retail sectors as well as Commercial platforms. Also, rapid urbanization in developing economies and increased adoption of lavish premium organic liquid soaps all across the globe are likely to boost the market during the foreseeable period.
