Abstracts

The Global Organic Spices Market size is expected to reach \$368 Million by 2025, rising at a market growth of 5.17% CAGR during the forecast period.

Organic spices are the natural spices which do not contain additives or artificial chemicals. Organic spices are usually grown in a fully natural or wild environment, avoiding any use of artificial pesticides. Organic spices add appropriate texture, taste and elevate the meal's nutrient content for which it is used for preparing. Organic spices and regular spices have nearly the same functionalities, but organic spices provide better and more health advantages as they consist of natural nutrient contents.

The growing demand for exotic and natural ingredients for their long-lasting aromatic properties, in food preparation, will further boost the organic spices market growth. Spices are an important ingredient in the majorly cooked cuisines across the world. This prevalence of organic spices can be attributed to their garnishing and flavoring benefits. They provide pleasant aroma and enhance the quality of food by adding a balanced amount in the cuisines.

Based on Product Type, the market is segmented into Chilli, Ginger, Turmeric, Clove, Pepper, Cinnamon, Nutmeg & Mustard Seeds and Others. Based on Form, the market is segmented into Powder, Granular, Extract and Raw. Based on Distribution Channel, the market is segmented into Offline and Online.
