## Abstracts

Power Management Integrated Circuits (PMICs) are electronic components which offer highly integrated, high-performance power management solutions to different end users, namely, automotive, consumer electronics, telecommunication & networking, and others. PMICs, due to features such as power management, system control, battery management, interface & audio functions, and other system specific functions has the ability to offer optimum integration solutions. The PMICs today are majorly used in voltage regulators, battery management IC, integrated ASSP power management IC, motor control IC, etc. With the integration of PMIC's, it is possible to design high-efficiency solutions which lead to extended battery life and also reduce power dissipation.

PMIC market is growing rapidly due to factors such as technological advancements and increased demand for battery-operated devices. Complex integration processes involved in multi-power domain SOCs of PMICs would be the major factor that would restrain the market growth. For instance, multi-voltage SOCs need highly robust methodology and tool sets to implement, which will lead to complications. The complicated process involved would restrain the market growth.

Based on the Product Type, the Power Management Integrated Circuit (PMIC) market is segmented into Voltage Regulator, Integrated ASSP, Battery Management ICs, Motor Control IC, and Others. Based on the Vertical, the market is segmented into Consumer Electronics, Automotive, Telecom & Networking, Industrial, and Others.
