## Abstracts

The IT security analytics falls within a broad scope in the security industry. When IT security is implemented smartly, with advanced concepts, it can work as a formidable counter for emerging threats. In the real world scenario, if threats are countered in time, counter measures can be implemented to have a secure environment. Despite advanced technologies, a complete mitigation might not be a possibility; however, the intensity of the effect can be contained, if timely acted on emerging threats. Post event analysis can also throw greater light on the possible paths chosen to attack data centers, and a thorough analysis will help in finding the loopholes within the system.
