Abstracts

The security testing market is anticipated to witness tremendous growth due to growing need for adherence to safety standards across industry verticals. The introduction of wide range of applications and an unprecedented growth in cyber threats have led to need for security testing services. The pressing need for a robust system to ensure the systems and applications are free from loopholes and accordingly prevent data loss is a significant driver to the market growth. The adoption of security testing also helps in identifying potential weaknesses within the system which may become the reason for data loss for organizations.

The security testing market is broadly classified into application services, application types, tools, deployment models, industry verticals and network services. Application services include enterprise/desktop application, mobile application, web application and cloud application. Application types are bifurcated into SAST (Static Application Security Testing) and DAST (Dynamic Application Security Testing). The tools segment is categorized as automated testing tools, code review tools, penetration testing tools and web testing tools. Based on deployment models, the market is bifurcated into on-premise deployment and cloud deployment.

Some of the industry verticals that deploy security systems would be retail, healthcare & life sciences, BFSI, IT & Telecom, and Government & Public utilities. Network services include Intrusion Detection System and Intrusion Prevention system (IDS/IPS) testing, Virtual Private Network (VPN) testing, firewall testing, and Universal Resource Locator (URL) / Unified Threat Management (UTM) testing.

Based on region, Security Testing market is segmented into North America (US, Canada, Mexico and Rest of North America), Europe (Germany, UK, France, Russia, Spain, Italy and Rest of Europe), Asia-Pacific (China, Japan, India, South Korea, Singapore, Malaysia and Rest of Asia-Pacific) and Latin America, and Middle East &

Africa. North America remained the dominant region in the global Security Testing market in 2015. LAMEA would witness highest CAGR during the forecast period (2016-2022).
