Abstracts

Virtual training is a simulated virtual environment which is created to assess the capabilities of trainees to select the right resource. The virtual training simulation is of two kinds, namely instructor-led training and non-instructor-supported training. Simulation, by definition is a process of imitation of an operation of a real world system or a process.

Growing awareness virtual training and simulation has positively driven the market growth. Fields such as civil aviation, military, e-learning, serious gaming, simulation-based gaming, entertainment, digital manufacturing, and healthcare use the technology widely, due to it's the advantages such as ease handling & understanding, offers virtual environment as close as real one, and efficiency of training.

The global virtual training and simulation market is segmented based on components, end user, and geography. The components segment is further sub-segmented into hardware and software. Based on end users, the market is segmented into defense & security, civil aviation, education, entertainment, and others. The education segment is further bifurcated into e-learning and game-based learning.

Based on region, Virtual Training and Simulation market is segmented into North America (US, Canada, Mexico and Rest of North America), Europe (Germany, UK, France, Russia, Spain, Italy and Rest of Europe), Asia-Pacific (China, Japan, India, South Korea, Singapore, Malaysia and Rest of Asia-Pacific) and Latin America, and Middle East & Africa.
