Abstracts

The NAND flash memory chips are introduced to reduce cost per bit without compromising on the performance and reliability of the memory chips. The implementation of 3D NAND flash memory technology has allowed reaching the desired output that is greater performance and higher reliability. 3D NAND has emerged as an ultimate solution for the above mentioned concerns and it looks like a viable option, due to higher storage density through multiple layer memory cell stacking, enhancing the storage and also providing enough space for the cells, eventually reducing the issue of inter-cell interference. Smartphones and tablets are some of the consumer electronics products that have leveraged the 3D NAND flash memory chips. Growing demand for 3D NAND flash memory technology across multiple applications would drive the market at a significant pace during the forecast period.

Based on the product type, the 3D NAND Flash Memory market is segmented into Cameras, Smartphone & Tablets, Laptop & PC's and others. The Applications highlighted in this report include Consumer Electronics, Enterprise, Automotive, Healthcare & Life Sciences and Others.
