Abstracts

The Latin America, Middle East and Africa Ambulance Services Market would witness market growth of 5.83% CAGR during the forecast period (2019-2025).

An ambulance is a primary vehicle for providing emergency medical services, though some use motorcycles, cars, planes, or boats as well. Ambulance services include emergency surface ambulance, standby ambulance, emergency air ambulance (a rotary wing), emergency air ambulance (fixed wing), non-emergency surface ambulance, as well as other services.

The growth of the ambulance services market has been propelled by the increasing geriatric population along with the rise in the prevalence of chronic diseases like cancer and diabetes, as well as complex medical needs. In addition, a growing number of alcohol and mental health problems along with an increased rate of road accidents are other significant factors responsible for the growth of the demand for ambulance services. According to the World Health Organization, about 1.35 million people die as a result of road traffic accidents every year.

In addition, the ambulance services sector comprises private and public providers offering air or surface transport services to seriously ill patients, along with primary

medical care. These vehicles are equipped with healthcare practitioners operating life-saving devices. For many countries, private ambulance services have emerged to provide ambulance services, particularly in rural areas that lack the necessary funds to provide free ambulance services and also due to state monetary issues.

Based on Transport Type, the market is segmented into Ground Ambulance Services, Air Ambulance Services and Water Ambulance Services. Based on Urgency, the market is segmented into Emergency Ambulance Services and Non-Emergency Ambulance Services. Based on Equipment, the market is segmented into Advance Life Support and Basic Life Support. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
