## **Abstracts**

The Latin America, Middle East and Africa Foot Care Products Market would witness market growth of 8.6% CAGR during the forecast period (2020-2026).

Foot diseases and many abnormal conditions of the foot are commonly occurring problems and yet they are mostly ignored ailments. Extended exposure to pressures on the foot and distance from the central circulation of the body makes the foot susceptible to numerous conditions. Often ignored owing to their benign nature, if foot diseases remain untreated then they can become a serious problem and can affect patient movement. Foot diseases are signs of causal systemic disorders like end-stage peripheral arterial disease, deep venous thrombosis, advanced arterial ischemia, psoriatic arthritis, Hepatitis C, etc.

Foot hygiene, habits, posture, lifestyle, and also the type of footwear worn can responsibly cause for several foot disorders. The foot care products market mainly comprises of numerous foot care medicine and devices that give short and long-term care for averting the occurrence of various foot disorders or for handling conditions that have manifested already. Aging results in foot diseases like warts, pain, and calluses.

Moreover, lifestyle-led conditions like obesity and diabetes result in numerous foot diseases like diabetic foot infections and ulcers.

The speedily changing lifestyle has resulted in more exposure to the skin of the feet, thus growing the demand for foot care products. For instance, they are progressively adopted by people. There are many devices, gels, tools, creams, and medications that are available for foot care and are used by paediatricians, pedicure centers, and diagnostic centers. On the contrary, things like weak distribution channels, and minimal penetration of foot care products, tools, and devices can hinder sales of foot care products, restraining market growth in the coming years. Low-income countries are ready to spend less on personal care including African countries, which are likely to limit the growth of the foot care products market.

Based on Applications, the market is segmented into Medical, Sports & Athletics and Personal Comfort. Based on Products, the market is segmented into Foot Creams, Foot Cleansing Lotions, Slough Scrub Products, Foot Repair Ointment and Other Products.
