## **Abstracts**

The Latin America, Middle East and Africa Hydrotherapy Equipment Market would witness market growth of 5.2% CAGR during the forecast period (2020-2026).

Hydrotherapy involves stimulation and gentle exercise in hot water at a constant temperature of 32 degrees Celsius. Hydrotherapy pools tend to be purpose-built with a constant or very gradual water depth of about 1 meter. Pools typically utilize multi-sensory equipment such as illumination and sound to activate the senses.

Hydrotherapy offers tangible benefits to the safety and well-being of children and young adults with a range of disabilities and conditions of wellbeing. Movement in water and water pressure significantly reduces the residual respiratory capacity for children and young people with chest problems. This enables more efficient lung function and reduces the risk of developing chest infections. In addition, the multi-sensory environment helps stimulate the senses while at the same time calming children with sensory and learning difficulties.

In patients with a history of chronic cardiovascular/pulmonary diseases hydrotherapy can be used to increase muscle and cardiopulmonary endurance. If a patient has been diagnosed with a cardiovascular or lung disease, hydrotherapy is also included in its program of rehabilitation. In people who find a problem with land exercise due to pain or restriction, hydrotherapy can prove particularly advantageous. This group of people may have a cardiovascular or pulmonary condition coupled with a musculoskeletal

complication. As part of a lung rehabilitation or cardiac rehabilitation program, hydrotherapy may be used. Hydrotherapy offers a uniquely supportive environment where people with many medical conditions can practice with less pain. For years, occupational therapists and naturopathic doctors have used water baths or hydrotherapy as a medical treatment. Over the last few years, however, hydrotherapy has become increasingly popular among a wider range of patients, ranging from elderly to professional athletes. Hydrotherapy was used for pain treatment and patients for recovery from bone and tissue damage. Recent research has shown that hydrotherapy may also help to maintain the integrity and hydration of the skin while reducing the loss of skin water.

Based on End Users, the market is segmented into Spa & Wellness Centers, Hospitals & Rehabilitation Centers and Others. Based on Type, the market is segmented into Hydrotherapy Pools, Hydrotherapy Tub/Bath, Chambers/Tanks, Underwater Treadmill and Others. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
