Abstracts

Infrared detectors are widely in use to detect infrared radiation and motion and to measure heat. Infrared detectors are integrated into various devices such as in surveillance, automobiles, testing, detection, and measurement. Market leaders have built highly sensitive infrared detectors that are playing a crucial role in industrial processes, consumer electronics products, space exploration, bomb diffusion, security & surveillance, and medical observations. Infrared detectors are capable of providing superior quality of monitoring in organizations by keeping track of entire processes, limiting security risks, and reducing operational costs. Security concerns and government regulations have compelled organizations to accept infrared detectors into the main stream operations. The infrared based detectors are very effective as compared to other detectors due to compact size and ability to detect infrared light from a far of distance. However, high installation cost and limited accuracy in certain conditions would be factors that would limit the market growth. Breakthroughs in infrared detector technology and price corrections due to the same would be favorable factors for the market participants.

Based on the type, the Infrared Detector market is segmented into Pyroelectric, Mercury Cadmium Telluride, Indium Gallium Arsenide, Microbolometer and Others. Based on technology, the market is segmented into Cooled IR Detector and Uncooled IR Detector. Based on wavelength, the market is segmented into Short Range, Medium Range and Long Range. The Applications highlighted in this report People & Motion Sensing, Temperature Measurement, Industrial, Spectroscopy & Biomedical Imaging, Military & Defense, Automotive and Others.

Based on Country, LAMEA Infrared Detectors market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria and Rest of LAMEA.
