Abstracts

The Latin America, Middle East and Africa Interactive Tables Market would witness market growth of 15.6% CAGR during the forecast period (2020-2026).

Interactive tables have greatly facilitated collaborative learning. Growing demand from educational institutes across the globe for such an interface has fuelled market growth. In addition, manufacturers emphasize on providing improved functionality and making certain items easy to use, which in turn helps improve consumer revenue.

Worldwide, rapidly increasing acceptance of interactive tables in the hospitality industry is expected to boost their demand in the years ahead. Restaurant use of these items is not a completely new trend. It has been seen in many ways in developing countries over the past several years. However, due to a lack of investment in infrastructure, digital restaurants have been seen as more of a novelty than a viable business opportunity. However, the trend has begun to shift in the last few years as further evolution has taken place within digital technology, such as the advent of interactive kiosks, tables, and video walls. Furthermore digitization of education improves participation, leading to improved quality of information. Similarly, interactive touch tables make content more engaging and educational, thereby increasing demand for the drug in the education sector over the forecast period.

Based on Screen Size, the market is segmented into 32-65 inch and 65 inch & above. Based on Technology, the market is segmented into Capacitive, LCD, LED and Others. Based on Application, the market is segmented into Education, Exhibition & Trade

Shows, Retail, Transportation & Hospitality, and Others. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
