Abstracts

The Latin America, Middle East and Africa Medical Digital Imaging Systems Market would witness market growth of 11.5% CAGR during the forecast period (2020-2026). Medical/Diagnostic Imaging refers to the usage of imaging modalities of different types to get visual images of the interior of a body that is further used for diagnostic and therapeutic purposes. The medical imaging comprises several types of modalities used to create an image of the human body for diagnosis, identification, and treatment of a range of diseases, and therefore it plays a dynamic role in improving healthcare services.

The growing awareness about chronic diseases and the emergence of technologies in medical devices are expected to be beneficial in minimizing the rate of mortality due to chronic diseases. The medical digital imaging system is considered to play an important role in the early diagnosis of diseases therefore its demand is increasing and these factors are contributing to the growth of the market. The rapidly aging population, technological advancements in diagnostic imaging devices, rise in adoption of medical imaging procedures, increasing awareness among people for the early diagnosis of clinical disorders are the major factors that are estimated to boost the growth of the diagnostic imaging market.

Technological advancements in diagnostic imaging devices, increasing prevalence of chronic diseases along with the rise in the aging population, increase in medical imaging procedures, and rising awareness among people for the prognosis of clinical disorders are the important factors that are anticipated to improve the growth of the diagnostic imaging market. Moreover, the untouched diagnostic imaging market in the regions of LAMEA is also likely to boost the overall market growth during the

foreseeable period. The dearth of helium, higher cost of imaging modalities, and hostile reimbursement scenario in developing countries may put limitations on the market growth, but then again, the rising healthcare investment in evolving markets will lift the demand for these diagnostic imaging devices.

Based on Type, the market is segmented into CT, Ultrasound, X-ray, Nuclear Imaging and MRI. Based on Technology, the market is segmented into 2D and 3D/4D. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
