Abstracts

The Latin America, Middle East and Africa Medical Imaging Workstations Market would witness market growth of 8.1% CAGR during the forecast period (2019-2025).

The changing lifestyle and growing cases of the aging population are increasing the demand for new technology and solutions that can help to detect diseases efficiently and early. The government's emphasis on population management is also a major contributing factor to such infrastructure investment. Investments in research and development have seen the demand for new innovative technologies increase exponentially. Medical imaging is one such area that has witnessed such development.

Medical imaging is a technology, process, and art of creating visualizations of a body's interior which assist in clinical diagnosis and medical intervention. This aims to expose internal structures and to diagnose and treat illness. Increasing demand for these technologies offers a unique opportunity for suppliers of medical imaging tools and has become an attractive market. This market is currently growing at a rapid rate.

Workflows at a hospital are widespread. When patients enter the healthcare setting,

there are workflows for admission, discharge, transfer; diagnosis; various radiology-specific activities including image acquisition, post-processing, and image processing; drug delivery and administration; and sedation and anesthesia. Eventually, these workflows need to work in a coordinated manner to allow for a complex surgical procedure. There is a surgical workflow inside the operating suite which includes the processes, implementation, and information present in this environment.

Based on Usage Mode, the market is segmented into Thin Client Workstations and Thick Client Workstations. Based on Modality, the market is segmented into Computed Tomography (CT), Magnetic Resonance Imaging (MRI), Mammography and Ultrasound. Based on Component, the market is segmented into Visualization Software and Hardware. Based on Application, the market is segmented into Conventional Imaging and Advanced Imaging.
