## Abstracts

Molecular Diagnostics is used to identify or monitor biomarkers associated with any particular diseases or conditions. This test could also help in detecting and quantifying the presence of specific bacteria and viruses. These devices help surgeons in deciding that which therapy would work best on different patients. Molecular Diagnostics detect the diseases by analyzing RNA (Ribonucleic Acid) or DNA (Deoxyribonucleic Acid) in humans. These diagnostics are mainly used for clinical testing devices that are supplied in clinics, hospitals, laboratories, and research institutes.

Rise in the incidence of chronic & infectious diseases and technological advancements is leading the market for molecular diagnostics market in LAMEA. According to the report by Avert in 2016, In Latin America, 1.6 people and In Brazil 830,000 peoples are dealing with HIV. Considering Middle East, studies stated that Middle East is a region with highest number of breast cancer cases and diseases. And the most effected population is the women under 60. In Addition, doctors have also stated the people are still unaware about the health issues in U.A.E and it is leading towards increase in infectious diseases.
