## **Abstracts**

The Latin America, Middle East and Africa Odor Control System Market would witness market growth of 9.1% CAGR during the forecast period (2020-2026).

Following numerous instances of escalating complaints concerning the impact of unwanted odors on human health, a number of central bodies have begun to lay down regulations on emissions from industrial sectors. Additionally, poor handling of public services like cinema toilets, bus or railways, hospitals and shopping facilities produce a pungent Odor in urban areas which affects both users and residents in neighborhoods. Worldwide, rising hygiene concerns propel the need for odor control systems with the adoption of these systems by several municipal corporations.

Major nuisance odors are often broken down into specific compounds such as hydrogen sulfide, ammonia, mercaptans, disulfides or other VOCs. Most of the Odor Control Systems are installed outdoors. Materials and structural integrity of the equipment are subject to wind and UV degradation from the sun. The smells emitted from factories and manufacturing plants have an effect on the climate, the safety of the city and the protection and efficiency of the plant worker. Most of the manufacturing plants are now faced with the challenge of complying with environmental air standards, directed by the regulatory authorities and health and safety organizations on the workplace.

Biofiltration is a biological mechanism that is widely used in drainage to remove toxins and odor. Micro-organisms that feed on the organic material kill the pollutants. This

reduces the need for biological oxygen and suspended solids and the need for chemicals in odor scrubbers.

Based on System Type, the market is segmented into Activated Carbon Odor Control System, Chemical Odor Control System and Biological Odor Control System. Based on End User, the market is segmented into Power & Energy, Chemical & Petro Chemical, Cement, Mining & Metal and Others. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
