Abstracts

The Latin America, Middle East and Africa Pediatric Imaging Market would witness market growth of 10.5% CAGR during the forecast period (2020-2026).

Hospitals and children's specialty centers will continually install pediatric imaging equipment in the future to enhance the diagnosis of small children and babies.

However, rising parental speculation about access to radiation tends to put pediatric images in a bad light. In addition, pediatric imaging curriculum remains young, and radiographers face difficulties in updating pediatric imaging techniques with the upgrades.

The efficacy of pediatric imaging devices in producing high-quality pictures, combining clinical information, and accurately evaluating the symptoms of the part of the imaged body continues to affect their sales. In 2017, x-ray pediatric radiology devices worth approximately US\$ 640 Mn was sold around the world. Throughout the first half of the projected period, demand for x-ray systems will remain high, but it will decline by the end of 2026. Ultrasound adoption of pediatric radiology products is expected to increase traction. Pediatric radiology market growth is expected to witness a rapid boost with the contribution of ultrasound systems and devices.

Pediatric Magnetic Resonance Imaging, or MRI, is a tool used to take pictures of a

circular tunnel in the middle. MRI uses radiofrequency to produce detailed two- and three-dimensional representations of the body of the infant, without radiation being used. Children's MRI is versatile and especially helpful for viewing tissues and organs anywhere in the body that usually can only be seen by surgery.

Based on End Users, the market is segmented into Hospitals, Diagnostic Centers and Others. Based on Modality, the market is segmented into Magnetic Resonance Imaging (MRI), Computed Tomography (CT), Ultrasound, X-ray and Others.

Based on Application, the market is segmented into Orthopedics, Gastroenterology, Cardiology, Oncology, Neurology and Others. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
