## Abstracts

The Latin America, Middle East and Africa Pulse Oximeter Market would witness market growth of 7.4% CAGR during the forecast period (2018 – 2024). Pulse oximeters are used to measure health parameters such as respiratory rate, heart rate, and pulse rate of a patient. These devices are used to monitor the health status prior to or during diagnosis. Pulse oximeters are used in various settings such as in medical settings, homes, or at medical emergency sites. Swift rise in geriatric population, increasing patient inclination towards home monitoring, and growing incidences of chronic diseases are currently driving the market growth. However, limited awareness about these devices in low- and middle-income economies would limit the market growth.

Based on Type, the market is segmented into Handheld Pulse Oximeters, Fingertip Pulse Oximeters and Other Types. Based on End User, the market is segmented into Hospitals & Other Healthcare Facilities and Homecare. Based on countries, the market is segmented into Brazil, Argentina, UAE, Saudi Arabia, South Africa, Nigeria, and Rest of LAMEA.
